PROFILE

I have around 8 years of experience in software development. I have expertise in making learning management systems, banking and payment systems, document management systems, and regulatory management systems with Node JS, Javascript, and Python. I have also been able to do devops operations inside Docker and Kubernetes.

WORK AND PROJECT EXPERIENCE

Nov 2023 - Present

PT. Ihsan Solusi Informatika Indonesia - Fullstack Engineer (Full Time)

As a Fullstack Developer at PT Ihsan Solusi Informatika, I am responsible for developing a comprehensive sharia banking system that adheres to Sharia financial principles. Leveraging Python for the backend and React.js for the frontend, I have built a robust and scalable system that enables efficient and secure banking operations. Some software projects:

- *Teller & CS Web App, iFos, Cash Management System, QRIS Merchant, Core Banking System Integration - Bank Jabar Banten Syariah* (November 2024), Tech : Python, React

Jan 2021 - 2023

Sirkel Kreasi Nusantara, Indonesia - Software Web/Mobile Engineer (Full Time)

My role is to lead technical & technology planning for database design, infrastructure design and selection of the best technology options for each project based on client requirements. Some software projects at Sirkel :
